Creation : By tradition.

Subsidiary Titles :

Family Name : Abachidze.

Family History : This family is so old that no-one has any real idea, even as to where it originally came from. According to one legend, it is of Abyssinian origin. At some time it got as far as Georgia and, if it can be said to come from anywhere, it is from that country. In 1825, it was recognised at the rank of prince by the Senate Directing the Russian Empire.

In fact, it may have originated in Abyssinia. One branch of the family established some very beautiful gardens in Canada. However, it is not certain that it is still in existence and we would appreciate further information.
